## **Encorium Group, Inc. expands its European operations with the opening of an office in the Cologne area, Germany, Encorium Germany GmbH**

**WAYNE, PA, April 28, 2008 – Encorium Group, Inc. (Nasdaq: ENCO)** a global clinical research organization (CRO) specializing in the design and management of complex clinical trials and Patient Registries for the pharmaceutical, biotechnology and medical device industries, announces the opening of an office in Erfstadt, Germany.

Encorium has successfully been operating in Germany through the last years with regionally located staff and in order to continue providing our clients with quality in clinical research we have now established an office in Erfstadt, Germany.

Christine Mohlberg, MSc., has been appointed as Country Manager for the operations in Germany. Christine brings more than 10 years experience in clinical research from both the pharmaceutical and CRO industry. Christine has extensive experience as a project leader working on a global scale and brings a wealth of experience in CNS and oncology.

The establishing of an office in Germany is a continuation of the company's growth strategy and a key factor in servicing our German clients. The German office will add to our presence in Europe which currently includes offices in Denmark, Estonia, Finland, Lithuania, Poland, Romania, Sweden, Turkey and United Kingdom and with regional staff in Czech, Italy, Spain and Ukraine.

Kai Lindevall, M.D., Ph.D., stated "Establishing the office in Germany is the next logical step in our continued growth strategy which will both assist our current clients working in Germany and provide excellent opportunity to increase our client base in Germany. We are very fortunate to have Christine heading up the office and expanding our operations in this important country. Christine has been working with Encorium for a year and a half and has proven to be a key executive in our operation."

### **About Encorium Group, Inc.**

Encorium Group, Inc. is a global clinical research organization specializing in the design and management of complex clinical trials and Patient Registries for the pharmaceutical, biotechnology and medical device industries. The Company's mission is to provide its clients with high quality, full-service support for their biopharmaceutical and medical device development programs. Encorium offers therapeutic expertise, experienced team management and advanced technologies. The Company has drug and biologics development as well as clinical trial experience across a wide variety of therapeutic areas such as infectious diseases, cardiovascular, vaccines, oncology, diabetes endocrinology/metabolism, gene therapy, immunology, neurology, gastroenterology, dermatology, hepatology, women's health and respiratory medicine.
